

CCTV Policy Statement

GEM-HSSE-0014

At Gemini we care about the protection of our people and assets.

For the protection of our assets and people Closed Circuit Television (CCTV) cameras are in operation. These CCTV cameras are located on the Offshore High Voltage Substations ZeeEnergie and Buitengaats and on the Land High Voltage Substation in Eemshaven.

The access to these premises is restricted only to personnel allowed by Gemini. The CCTV is operated within the legislation applied by the Dutch authorities.

The General Data Protection Regulation Act (GDPR) monitors the protection of personal data. The cameras are intended to monitor assets only. However, where personnel are captured on CCTV all relevant GDPR requirements will be met, this means data will not be distributed or saved for longer than short term.

If you require more information or you have questions about this policy statement, please contact HSE@geminiwindpark.nl
